The screenshot shows the 'Solve Me First' challenge page on HackerRank. The challenge is a warmup problem for the 'Algorithms' track. The user's rank is 4554634 and they have 1/30 points. The challenge is rated 'Easy' and has a max score of 1. The user has submitted the solution 5031017 times. The problem description asks the user to complete the function solveMeFirst to compute the sum of two integers. The example shows a = 7, b = 3, and the return value is 10. The function description specifies the parameters: int a (the first value) and int b (the second value). The constraints are 1 ≤ a, b ≤ 1000. The sample input is a = 2, b = 3.

Rank: 4554634 | Points: 1/30

Problem | Submissions | Leaderboard | Discussions | Editorial

Complete the function `solveMeFirst` to compute the sum of two integers.

Example

`a = 7`
`b = 3`
Return 10.

Function Description

Complete the `solveMeFirst` function with the following parameters:

- `int a`: the first value
- `int b`: the second value

Returns

- `int`: the sum of `a` and `b`

Constraints

$1 \leq a, b \leq 1000$

Sample Input

```
a = 2
b = 3
```
